

WE ARE READY. FOR YOUR IDEAS!

Join the new flagship project for the aeronautics and space sector. Our space incubator is set to take on startups from the German federal states of Bremen and Schleswig-Holstein. Support to startups from other federal states in Northern Germany is under negotiation.

- › zero equity funding
- › access to space industry and user community
- › close technical and business support
- › shared workspaces

ESA BIC NORTHERN GERMANY

The Incubation Centre of the European Space Agency in Northern Germany (ESA BIC Northern Germany) is headquartered jointly with the Bremen aeronautics and space industries association AviaSpace Bremen at the BITZ, the largest innovation and technology centre for high-tech companies and startups in Bremen. The ESA BIC Northern Germany brings new startup opportunities to the region and thus strengthens the aeronautics and space sector in the German federal state of Bremen.

Aviaspace Bremen supports the incubatees with its network, public relations work and targeted coaching not only during the incubation period, but also afterwards as alumni. Starthaus is the central point of contact in the Bremen startup ecosystem and supports the startups on all issues relating to business development and financing.

The ESA BIC Northern Germany is managed by Anwendungszentrum GmbH Oberpfaffenhofen (AZO), an international networking and branding company for the European space programmes that also manages ESA BIC Bavaria with three locations in southern Germany.

Since 2021, ESA BIC Northern Germany has also been offering its service to space-related startups in Schleswig-Holstein. The Technikzentrum Lübeck with GATEWAY49, AviaSpace Bremen and AZO jointly operate this extension of ESA BIC Northern Germany. There are also plans to extend ESA BIC Northern Germany to the northern German federal states of Hamburg, Lower Saxony, Mecklenburg-Western Pomerania and Berlin-Brandenburg.
